BALTIMORE NEEDS NEW HIGH PRESSURE

City Narrowly Escapes Repetition of the Big Fore of 1904.

BALTIMORE, Md., Dec. 3.-This city of high pressure fire pipes throughout

in the fire department do not hesitate to from increasing their rates to Govern declare that with the high pressure fire ment employes more than 35 per cent

The failure to have the pipe line fin-ished is because of a delay of fifteen nished by the Government itself. months in wrangling after it was decided to construct it. The lesson of last will furnish information which will justify the commission in determining possible time.

Origin of Fire.

The origin of last night's fire is still mystery. It started about 5:45 last evening at 104 Hopkins place, within a strong east wind and the fact that the to Mr. Tawney's enemies in Minnesota fire was in a very inaccessible place, gave the flames great headway before the fire department could respond The fight lasted all of five hours before complete control of the flames was as-

This morning the ruins still smoke and here and there a fitful flame smoulder-Several streams were still being played on the ruins by members of the fire department. The buildings that are a total loss are:

104 Hopkins place, occupied by C. J. Peed; Spear Bros., and the Royal Cap Manufacturing Company. 106-108 Hopkins place, occupied by McCaddin & McElwee, picture frames

and art goods. glass, paints and oils.

100 Hopkins place, the Maryland building, sheltering the offices of over seventy firms, most all of whom were unable to recover their papers. Firemen's Stand.

Adjoining the destructed buildings is the large warehouse of R. M. Sutton Company, and it was here that the firemen made their bravest fight in an effort to check the flames. They finally did so but at the cost of injury to seven of their number, who were bad-

to the hospital.

Owing to the water damage to firms edy hing the buildings burned it is all ficult to make a correct estimate of the damage done by the fire. While they range from as low as \$500,000 up to a million it is believed that the correct damage will be found about midway between these two estimates. The percentage of insurance on the loss will be about as usual.
